- SPECIAL PARTS IN STAINLESS STEEL FOR 60 FIRE DOORS

**Restructuring of an office building.**

The building is developed on 6 floors, where it will host a set of offices.

The ground floor is dedicated to the activity of the Caixa de Depositos bank, as well as a common area, a business center, a shared work space, an auditorium and a cafeteria.

The role of SADEV

To meet the different characteristics of the facade, SADEV developed «minimalist» technical solutions dedicated to «firefighter access» called **firefighter openings, without frames.**

The OPs - Opening / pivoting / + smoke extraction with glazing 1800 mm high x 1000 mm wide on a minimalist pivot, Marceau project.

The OP-SADEV stapled systems adapt to the architecture and the architect's plan, letting in a maximum of light thanks to the low-profile rooms (max. height 200mm visual).

Our fire doors are tested according to the 300 cycle standard.
