REALISATION
2019/2021

SURFACE
15.000m²

▪ THIS PROJECT REQUIRED 600 ML OF SABCO
GUARDRAILS, PART OF WHICH WERE CURVED.

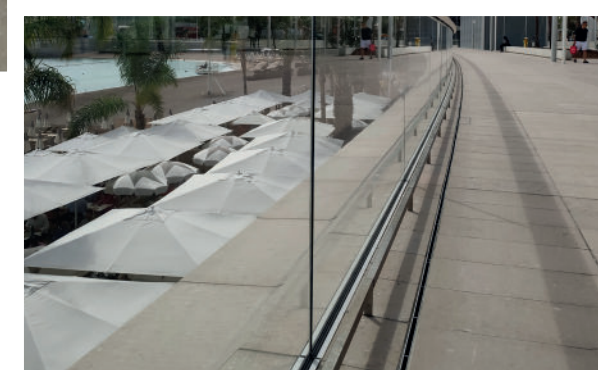

Le Larvatto, the Principality's seaside district

The aim was to raise the seafront to the same quality standards as the Promenade Princesse Grace, while continuing the Mareterra project. Simplification and unification were the watchwords for this project. Renzo Piano therefore imagined a space that blends in with the characteristic curve of the bay, giving it geometric continuity while creating a breathable space that is attractive to users and shops alike. The SABCO guardrail system was therefore a perfectly suited solution, giving transparency and depth to this promenade that showcases Monaco's beautiful coastline.

Sadev's role

SADEV supplied 600ml of SABCO 7010 glass balustrades with calculation notes.

This arrangement of balustrades with a curved section and our glass handrails ensures pedestrian safety without distorting the beautiful landscape of the Bay of Monaco
